

Quality Engineer

for fastmoving Swiss high-tech company

Position: Quality Engineer
Employment: Long term contract – 100 %
Company: Bcomp Ltd., Fribourg, Switzerland
Starting date: September 2021 or as soon as possible

Position Overview

Bcomp Ltd. is a young and dynamic Swiss company specialised in the development, marketing, and sales of natural fibre composite solutions for high performance applications. With a background in the sports industry, we are now focusing on entering the motorsports, marine and mobility markets. We develop sustainable lightweighting solutions based on natural fibres in close collaboration with our customers, in a fast-paced and entrepreneurial working environment.

To strengthen its operations team and further boost its market entry into large-scale mobility, Bcomp is looking for a Quality Engineer.

The person will interact closely with internal and external stakeholders. Connected to the Quality Manager, the main mission will be to support the implementation of new ISO 14001 and IATF 16949 certifications for our head quarter, our production area and our outsourced manufacturing; and also be in charge of some quality activities such as quality control, non-conformities, etc. Furthermore, training and coaching on the different methodologies, implementation of new tools and support for a change of mindset will be part of the challenge for this position.

Main responsibilities

Global Quality

- Support the Quality Manager in various tasks connected to the continuous improvement of the quality management system
- Management of the non-conformities, claims, improvement points

Conformity and Certification

ISO 14001, IATF 16949:

- Responsible for the update of the documentation to meet the new requirements from the certifications
- Lead the defined action plan connected to the other departments and managers
- Support the different team members to deliver the expected results on time

ISO 9001:

- Support the consolidation and continuous improvement of the actual QMS
- Support the integration of the production area in the scope of the next ISO 9001 certification
- Be proactive

Qualifications and Personal Qualities

- Quality engineer (or equivalent)
- Experience in quality in an operational field context, quality management, improvement tools
- Experience on ISO 9001 & ISO 14001 certifications would be appreciated, IATF 16949 is a strong asset
- Languages: fluent in French, strong skills in English, German is a plus
- MS Office and standard IT tools
- Able to work autonomously and share relevant information with the team
- Structured way of working with an ability to handle many tasks in parallel
- Ability to identify opportunities and to propose improvements
- Able to work under pressure with short deadlines
- Strong verbal communication skills to coach the team during changes and implement standards
- Positive and energetic mindset – everything is possible!

About us

We are a small, dynamic, international team working in a fast-paced, equal, and entrepreneurial environment. Each person takes responsibility for their work and contributes to a friendly work atmosphere with many laughs and a healthy appreciation for chocolate.
