

Quality Engineer

for fastmoving Swiss high-tech company

Position: Quality Engineer
Employment: Permanent – 100 %
Company: Bcomp Ltd., Fribourg, Switzerland
Starting date: April 2022 or as soon as possible

POSITION OVERVIEW

Bcomp Ltd. is a young and dynamic Swiss company specialized in the development and sales of natural fibre composite solutions for high performance applications. To support the company's current hyper-growth phase and further boost its market entry into large-scale Automotive, Bcomp is looking for a Quality Engineer. The person will be a part of the quality team and interact closely with internal and external stakeholders.

The main missions are based on the realization of the operational quality points: from the definition of specifications, control plans, up to participation in development projects and the management of customer complaints.

The implementation of IATF 16949 certification will also be at the heart of the position with the use of the automotive core tools and their diffusion in the company.

Training and coaching on the various quality methods as well as the implementation of tools and the management of changes within the teams are also part of the challenges of this position.

MAIN TASKS AND RESPONSIBILITIES

Quality

- Ensure the continuity of our quality management with our partners (specifications, quality control, continuous improvement)
- Management and involvement in the treatment of non-conformities, complaints, points for improvement
- Internal auditor to ensure the conformity and continuous improvement
- Participation in internal projects as a quality representative

Conformity and Certification : ISO 9001, IATF 16949, CSR

- Ensure the updating of management system to meet the certifications and customer specific requirements, coaching and following of their implementation into the activities
- Manage the connected action plans with the other departments and managers
- Support the various team members to deliver the expected results on time
- Proactive mindset to support the continuous improvement and our efficiency

QUALIFICATIONS AND PERSONAL QUALITIES

- Quality engineer (or equivalent)
- Experience in Quality in an operational quality context: quality management system, continuous improvements tools, root cause methodology; experience as internal auditor would be a strong asset
- Experience in industry certified IATF16949 or EN9100 would be a strong asset
- Experience on Certification ISO 9001, IATF 16949, EN 9100 would be a strong asset
- Languages: Fluent in French, strong skills in English, German is a plus
- MS Office and standard IT tools
- Able to work autonomously and share relevant information with the team
- Structured way of working with an ability to handle many tasks in parallel
- Ability to identify opportunities and to propose improvements
- Able to work under pressure with tiny deadline
- Strong verbal communication skills to coach the change and implement standards
- Positive and energetic mindset – everything is possible!
