Position Overview

Bcomp is looking for a Quality Project Leader to ensure that Bcomp's suppliers in China comply with automotive quality standards. The Quality Project Leader – working closely with the global team in Fribourg, Switzerland – will be responsible for implementing quality standards related to specific product development projects.

Main Responsibilities

- Set up all aspects of quality control for new products at contract manufacturers
- Audit and qualify contract manufacturers to Bcomp's standards and IATF norm requirements
- Work with contract manufacturers to implement quality standards required by automotive industry (ISO 9001, ISO 14001, VDA, IATF)
- Work with Bcomp's contract manufacturers to implement ESG (environmental, social, governance) requirements
- Lead the quality and PPAP documentation (PFMEA, control plan, MSA etc) with local suppliers
- In case of quality issues, lead the root cause analysis and manage all steps to resolve the problem
- Connection point between Purchasing, Quality and R&D team in Switzerland and local suppliers in China

Qualifications and Personal Qualities

- University degree in engineering
- Minimum of five years of experience in quality management in either automotive (at a Tier-1, Tier-2 or OEM), textile or polymer industry
- VDA auditor permit is a strong plus

- PMP (project management professional) certificate preferred
- Prepared to travel frequently, especially in Asia and potentially in Europe
- Structured way of working with an ability to handle many projects in parallel
- Strong verbal and written communication skills in English are mandatory
- Positive and energetic mindset – everything is possible!

Key Performance Indicators for This Role

- Gaps filling from initial supplier quality assessment
- Percent of PPAP document delivered in time
- Average number of days to close nonconformity
- Non quality average cost
