

QUALITY SPECIALIST INTERN

IN A FASTMOVING SWISS HIGH-TECH COMPANY

Position:	Quality Intern
Employment:	100%
Company:	Bcomp Ltd., Fribourg, Suisse
Starting date:	To be discussed
Duration:	min. 4 months

POSITION OVERVIEW

Bcomp Ltd. is a young and dynamic Swiss company specialised in the development, marketing and sales of natural fibre composite solutions for high performance applications. With a background in the sports industry, we are now focusing on entering the motorsports and mobility markets. We develop sustainable lightweighting solutions based on natural fibres in close collaboration with our customers, in a fast-paced and entrepreneurial working environment.

To strengthen its Quality team and collaborate with all the other departments, Bcomp is looking for a Quality Specialist Intern.

The position offers the opportunity to manage all operational issues as well as ensure the application of Bcomp standards in a very dynamic and innovative industrial context. The intern will also work in collaboration with the quality manager to support the implementation of the requirements of the certifications expected for 2023 (ISO 9001, IAFT 16949).

Depending on the profile, different improvement projects can be offered (system quality, operational quality, supplier quality, project quality, etc.)

MAIN TASKS AND RESPONSIBILITIES

Quality - Internal Production

- Ensure quality control of raw materials and finished products before shipping
- Follow operational reviews with the production team and manage quality issues (non-conformity management, root cause analysis and problem resolution, action plan follow-up...)
- Implement and coach the quality control plan and quality standards in production; manage production reports; release finished product
- Support the deployment and maintenance of quality and continuous improvement tools such as control plans, SOPs, cleaning, 5S implementation, participation in the realization of experience plans

Quality - External production and supplier

- Manage the production and quality reports for our outsourced production and for the suppliers

Quality - Project

- Support the quality team in the conduct of product capabilities and statistical analysis, including the realization of measurements and the edition of final reports
- To support the quality team in the various activities related to automotive projects (creation and implementation of documentation in connection with APQP, PPAP and other automotive core tools) and non-automotive projects (standardization of our processes, audit checklist, etc.)

Quality - System

- Support the deployment of the ISO 9001 process throughout the company
- Support the deployment of an electronic document management solution, as well as their standardization throughout the company's processes

QUALIFICATIONS AND PERSONAL QUALITIES

- B.Sc. (or equivalent) in Material Science, Quality or Engineering
- Junior experience in a quality department in an operational context (3 months)
- English language required. Any other language is also appreciated.
- Able to work independently, cross-functionally and share relevant information with the team
- Structured work method with the ability to manage multiple projects in parallel
- Ability to identify opportunities and propose improvements
- Strong verbal communication skills to support change and implement standards
- Positive and energetic spirit - anything is possible!

ABOUT US
